Re: Oil Spill on West Division at
Underpass

Frisco Railroad Company called and reported an oil spill on West Division Street at the underpass. Upon investigation it was found that Frisco was moving a Caterpillar, on a low boy, and a hydraulic hose broke. The spill started roughly from Glenn Avenue, as they were leaving the freight yards, to Division and Golden. It was estimated to be 10-15 gallons of hydraulic fluid. Sawdust was placed on the street to absorb the fluid and to prevent hazardous road conditions. There was no evidence that any of the hydraulic fluid reached the storm sewer.
